

# Reusable Bags

## Reusable Tamper-Evident Security Bags

The reusable bag is specifically designed to secure money, confidential documents and sensitive information.

When the tamper-evident bag is closed and sealed with the Mega TEBCO DC chamber seal, the security transaction is completed.

### Features

- 1 The zip bridge and slider are both totally enclosed within the chamber cover. This tamper-evident enclosure of 2 vital security elements of the bag is the unique feature of the Tebco™ chamber.
- 2 All rivets holding the chamber are totally covered within the bag when closed.
- 3 The zip chain is sewn on the bag with the reverse side out to prevent the bag being broken into via the zip chain and then re-meshed with the intention of not showing evidence of entry.
- 4 A clear window is only accessible from the inside of the bag. The window is made from clear vinyl and heat welded on the bag with strong bonding.
- 5 The bag can be screen printed with company name or logo for easy identification.

### Technical Specifications

#### PRODUCT

**Materials:** All standard bags are produced from PVC mesh, a tough and reinforced fabric. PVC is water-repellent, giving the bag considerable waterproof protection. The bag can also be custom-made with other materials such as polyester, nylon, canvas etc.

**Locking:** The sealing of the bag is engaged by inserting a security seal that fully locks the chamber cover. The

chamber is made of clear ABS material for inspection purposes.

**Standard Colours:** Blue, red, plastolene.

**Customisation:** Optional customisation for size, colours and logo printing subject to a minimum order quantity.

*Tebco and Tebco DC are trademarks of Tebco International Inc.
